

Editorial coverage

Some of the topics that **Solar** will cover

Sourcing

- Local infrastructure
- Materials
- Developing internal infrastructure
- Factory location
- Local authority rules, regulations and assistance

Factory Environment

- Meeting manufacturing infrastructure with actual needs
- Factory requirements and layout for effective manufacturing
- Flexibility for future manufacturing needs
- Choosing the right partners

PV Manufacturing

- Tool and process selection
- Materials
- Manufacturing challenges and solutions
- Metrology and data usage
- Cost management to achieve grid parity
- Metallization
- Sub systems
- Types of PV and manufacturing needs
- Increasing efficiencies

Market Place

- Types of PV and their application
- Material supply
- Consumer benefits
- High end PV applications
- Potential applications

EH&S Issues

- Materials
- Waste disposal & recycling
- Standards
- Efficiency comparison to other renewable resources
- Contamination control

PV Modules

- Concentrator cells
- Integration
- Electrical needs
- Converters
- Sourcing
- Light absorbers

Industry issues

- Standards
- Analysis
- Regional focus
- Market breakdown by process
- Semiconductor influences

Solar will be published quarterly on a seasonal basis

Spring
Summer
Autumn
Winter

Launch edition Winter 2008
